EMPOWERING SAILORS

OST

ONS

Like other NACRA catamarans, the design team have given sailors simplicity, quality and performance in one small catamaran. There's nothing standard about this craft.

Just look at the clean hull lines, note how the beams are recessed into the hulls, yielding greater rigidity to the platform. See the level of buoyancy in the hulls meaning you stay as close to "on top" of the water as possible. Note that NACRA build in the sure footed non-slip on the side of the hulls making trapezing even easier and safer. NACRA kick-up rudders are just the same delightful mechanism as the bigger boats, making launching and recovery truly "plain sailing".

The MNX mainsail gives real power for a smaller catamaran and the Dacron jib will give years of life to this wonderful little catamaran. The jib is sheeted to the front beam allowing space on the trampoline. Sails are made by Performance Sails, one of the worlds leading sail makers, so you know that they are prepared just for you.

The 460 is a tough lightweight catamaran that will give the whole family years of fun, she is the smallest NACRA in size but with a large character and where thousands of families will start their sailing careers, whether that be just one member gliding across the waves or more using the trapeze to gain the full benefit of the hidden treasures of the NACRA 460.

The NACRA 460 is also available with Sports package which includes the MNX sports jib spinnaker kit.

Boat length	4.50 m/14.9 ft
Boat width	2.35 m/7.7 ft
Mast length	7.77 m/25.5 ft
Area mainsail	12.3 m ² /132.4 sqft
Area jib	2.88 m ² /31 sqft
Area spi	15 m ² /161.5 sqft

The NACRA 500 is the ideal family craft for those who want simplicity and performance, the large buoyant hulls enables you to drive her across the waves in ease in most conditions.

Large trampoline area means that you have real space and as it is tensioned it provides a real platform. Trampoline, like all other NACRA's is of mesh polypropylene allowing the water to quickly drain through keeping sailors as dry as possible. The Performance Sails main is made modern MNX material giving a good looking smart appearance and the jib is Dacron, giving long life strength and performance.

The 500 provides high performance recreational sailing at an affordable price, local Club racing, where she has been called the "pocket rocket" by the catamaran fraternity for years. The NACRA 500 is simple, but great design means that she is just quicker than she should be!

The perfect craft that is used within sailing schools, clubs, rental facilities but also private families who love to go for a blast with each other. Easy to trailer, can be roof topped on any car to make unforgettable times in holidays. Easy way to be having the time of your life, simple, fun and exciting!

Boat length	5.0 m/16.4 ft
Boat width	2.44 m/8 ft
Mast length	8.23 m/27 ft
Area mainsail	14.15 m ² /152.3 sqft
Area jib	3.52 m ² /37.9 sqft
Area spi	17 m ² /183 sqft

Big fast catamarans are often too complicated and take hours to prepare on the beach. Not the 570, she is simple, fast, graceful and has thrilled sailors for many years.

The 570 is the largest skeg hulled catamaran made today, like all other NACRA's, the 570 is built with polyester sandwich foam giving the hulls real stiffness and strength. She has real volume in front of the beams and so doesn't suffer the potential catamaran problem of "nose diving". The 570 will carry two crew comfortably and even three when cruising.

The Dacron jib is sheeted to the front beams giving a large spacious trampoline area where the platform is firm and clear of all blocks and lines. The main is built from MNX providing a hard long wearing material that holds the sail shape providing a real power unit. Kick up rudders allowing for easy launching and recovery and are operated with real ease. Double trapeze is needed in the upwind when the breeze is up to hold the power of the 570.

The perfect craft that is used within sailing schools, clubs, rental facilities but also private families who love to go for a blast with each other. The Nacra 570 carries easily three persons which means an instructor plus two adults. Easy to trailer, to make unforgettable times in holidays. Easy way to be having the time of your life, simple, fun and exciting!

Boat length	5.65 m/18.5 ft
Boat width	2.44 m/8 ft
Mast length	9.15 m/30 ft
Area mainsail	16.55 m ² /178.15 sqft
Area jib	4.55 m ² /49.9 sqft
Area spi	21 m ² /226 sqft

Since 1975 NACRA has always been about empowering sailors. Getting the best out of yourself and your team with NACRA supplying the equipment. Reaching new heights and pushing your boundaries. That's NACRA SAILING!

NACRA & PERFORMANCE SAILS are based in The Netherlands. Nacra has been originally founded in 1975 and draws it's knowledge therefore from a long history of building and supplying catamarans to the world of sailing.

Nacra catamarans in the 460, 500 and 570 series are available in Fun, School and Sport configurations.
